DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 27-40 and 54-57 drawn to a method of wagering on a symbol in a slot machine, classified in class 463, subclass 20.
- II. Claims 41-53, drawn to method for repositioning of symbols in a slot machine, classified in class 273, subclass 138.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the ability to alter the outcome of the game after it has already been originally presented giving the capability to alter the award presented to the player based on the occurrence of certain symbols. This would have a separate utility for not only a slot game as described above but also in bonusing situations wherein the animation sequences can be introduced providing further separate utility for the disclosed subcombination. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Further, the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

As this restriction is in response to an Applicant's presentation of entirely new claims, It has been determined that a written restriction best identifies the issues at hand to clarify the examiner's position.

Art Unit: 3713

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Marks whose telephone number is (703)-305-7497. The examiner can normally be reached on Monday - Thursday (7:30AM - 5:30 PM).
